**OUTPERFORMANCE SINCE INCEPTION**  
(106 Total Quarters)

The chart above illustrates the average annualized return of the LCES during both rising and declining markets since inception. Rising markets: quarters with positive S&P 500 return. Declining markets: quarters with negative S&P 500 return. Positive and negative quarters are separated from intervening quarters, accumulated across periods and annualized. All performance is stated gross of fees. Standard Deviation is a measure of absolute volatility of returns. Alpha is a measure of performance on a risk-adjusted basis.
